Price: \$812.0

Detailed Description

The Tommy Scent detergent is used in the Front Presoak application of the wash tunnel. The Lemon Scent is used to generate an even more positive impression of your wash among customers. Simply inject a small amount of concentrate into the water stream along with your favorite unscented product using a "dual draw" injector. This pleasant lemon aroma will work it's way into the air intake of customer vehicles, activating yet another of the five senses and producing a more positive and above all CLEAN impression for guests. This detergent comes in 30 gallon containers.
