

Mean Well 133A 3192W 24VDC Power Supply

Part Number: CCS-71218635

Description: Mean Well DPU-3200-24 Power Supply

Price: \$578.35

Detailed Description

This power supply can be used in multiple applications including the Main Control Center 1 unit. The power supply has a voltage rating of 24 VDC, rated current of 133 A, and rated power of 3192 W. It has multiple protections built in including constant current limiting, built-in cooling fan, and re-power on to recover.

Specifications

- Input Voltage: 96-264 VAC
- Output Voltage: 24 VDC
- Current Rating: 133 A
- Power Rating: 3192 W
- Frequency Range: 47-63 Hz
- Operating Temp. Range: -22F-158F
- Efficiency: 93.5%

Instillation
