

Atlas Copco Screw Air Compressor 7.5 HP with 71 Gallon Tank

Part Number: E-SE-AIR-75-V2-A

Description:

Price: \$12,345.0

Detailed Description

This Atlas Copco rotary screw air compressor is used in the backroom of the wash tunnel. There are typically two compressors used in the wash that control all the air functions throughout the wash site. These air compressors are 7.5HP and have 71 gallon air tanks on them. The tanks are horizontally configured and included along with the air dryer on these compressors. They have IE3 premium-efficiency motors with TEFC enclosure that lower energy use and costs as well as low-vibration screw elements that help minimize noise. With a noise level at 65 dB(A), these compressors can be installed close to the point of use. This compressor is the G5 compressor that is part of the Atlas Copco G Series of Air Compressors.

Specifications

- Voltage: 208-230/460 V
- Horsepower: 7.5 HP
- Max Working Pressure: 116 PSI
- Capacity Delivered: 29.2 CFM
- Package Power Input: 6.9 kW
- Noise Level: 65 dB(A)
- Operating Temp. Range: 34F-115F
- Tank Outlet: 1/2"
- # of Phases: 3-Phase
- Efficiency: 89.5%
