

Motor for Dual Belt Conveyor Drive Unit

Part Number: P-C-DB-MOTOR

Description: SEW Eurodrive Drive Motor - Used for the Dual Conveyor Belt

Price: \$

Detailed Description

Motor used in the dual belt conveyor drive unit in the wash tunnel. This motor is paired with a gearbox to create the drive unit, powering the dual belt conveyor system to push vehicles along the belt. The motors come in 15HP, 20HP, or 25HP options and have a voltage rating of 230/460 VAC. Each motor is CSA certified and corrosion resistant to the harsh wet wash environment.

Specifications

- Horsepower: 15, 20, or 25
- Frequency: 60 Hz
- Voltage: 230/460 VAC
- Amperage: 50/25
- Phases: 3 Phase
- Speed Range: 300-1,800 RPM
- Operating Temp. Range: -4F-104F
- Color: Gray
- Nominal Efficiency: 93.0 %
