

Stainless 10' Slotted Strut Channel

Part Number: P-INS-2001

Description:

Price: \$124.99

Detailed Description

This slotted strut channel is used in the High Pressure Pump Plumbing System at the wash site. This channel can be used for mounting, bracing, supporting, or connecting loads. It can be used for pipe, electrical, or data wiring. Each slot length is 1-1/8" with 2" in between each slot. The channel has an overall length of 10' and is made of stainless steel to prevent rust and corrosion.
