

Wrap/Combo Unit Wetting Foaming Manifold

Part Number: P-M2050

Description:

Price: \$334.0

Detailed Description

Foaming wetting manifold used in the Wrap Mitter Combos in the wash tunnel. This manifold is mounted into the arches and provides a foaming spray by having the foam generator and foaming head mounted on the manifold. There are two clamps with 2-1/2" inside diameter to mount around the stainless arches. The coupling holes on the manifold are 1/2" ID. This is for one singular manifold that is made of stainless steel.

Specifications

- Coupling Diameter: 1/2" ID
- Clamp Diameter: 2-1/2" ID
- Length: 45-7/8"
- Material: Stainless Steel
