

# Belt Conveyor Chain Coupling

**Part Number:** P-C2163

**Description:** Belt Conveyor Chain Coupling Offered in 2", 2-3/4", and 2-15/16" Bore Sizes - Used for Drive Shafts

**Price:** \$

## Detailed Description

Belt Conveyor Chain Coupling offered in bore diameters: 2", 2-3/4", and 2-15/16". These chain couplings fit on the drive shaft before the shaft goes into the bearing at the exit of the wash in the pit at the drive section. These couplings are metallic, have grease lubrication, and are close coupled.

## Specifications

- Bore Sizes: 2", 2-3/4", and 2-15/16"
- Coupling Type: Metallic
- Coupling Style: Chain
- Flange Material: Steel
- Lubrication: Grease
- Max Speed: With Cover 2,000 RPM, Without Cover 500 RPM
- Shaft Spacing: Close Coupled
- Temperature Rating: -30F-225F
