

1/4" Male Spray Tip Nozzle

Part Number: P-WAT-2192

Description:

Price: \$4.54

Detailed Description

This nozzle is used on multiple applications including High Pressure Arches, High Pressure Rinse, and the Fixed Rocker Blaster. This 1/4" spray tip nozzle is ideal for high impact pressure washing. It offers great wash flow and super positioning in the wash. It is made of a hardened stainless steel construction that makes it high corrosion and impact resistant as well as ensures longer operation life. The flat spray nozzle provides an even, uniform spray pattern every time. Can be used on wands, arches, conveyor systems, or anywhere high pressure washing or rinsing is needed.
