Description: To qualify for free shipping, drums of detergent need to be ordered in multiples of 5. You are welcome to mix and match various detergents to create a skid of 5.

Price: \$769.08

Detailed Description

The Tommy Drying Agent (formerly Super Dri) detergent is a premiere drying agent offering consistent, high quality drying for automatic car washes. The Drying Agent aids in water beading in the drying process. It helps the water drops to be blown off the vehicle for the best dry possible. The polymers in the Drying Agent formula quickly break down the water droplets, allowing for more beading effect to take place and a smoother surface in the end. It comes in a 30 gallon drum.
