

# Rubber Bump Stop 3/8" MNPT Thread

Part Number: P-M1014

Description:

Price: \$31.68

## Detailed Description

This rubber bump stop is used on multiple pieces of equipment in the wash tunnel including on the Rocker Brush arms, Tire Shine arms, Wrap brushes, etc. This bump stop is used to prevent damage caused by the swinging motion of brushes and other equipment. Now longer and softer than the original version, it is made from tough, resilient rubber to absorb impact. The bump stop helps stop the assembly before it makes contact with other equipment or vehicles, ensuring safe operation and protecting both equipment and vehicles from damage during use.

## Specifications

- Screw Diameter: 3/8"
- Screw Length: 3/4"
- Bump Diameter: 2-1/4"
- Bump Length: 3"
- Material: Rubber
