

220V Non-Accumulating Vacuum Timer

Part Number: E-VAC-109

Description: GS-410 Non-Accumulating Vacuum Timer

Price: \$169.0

Detailed Description

Non-Accumulating vacuum timer used for push button Tommy vacuums in the vacuum area of the wash site. These timers service up to three vacuum motors and shut down each motor after every cycle. The timer is a non-accumulating design, not allowing coins to accumulate and time to be added while in operation. It has a 220 VAC voltage input rating and customizable setting to allow you to change how many coins needed to start, how long is given per coin, etc.

Specifications

- Voltage Input Rating: 220 VAC
- Time Per Coin: 1-511 Sec.
- Coins to Start: 1-31 Coins
