

4-Port Hydraulic Power Unit Flow Divider

Part Number: P-SE-2113

Description:

Price: \$1,332.0

Detailed Description

This flow divider is used in the 4-port Hydraulic Power Unit in the wash tunnel of the wash site. The flow divider helps control the amount of hydraulic fluid that is dispersed to each function in the tunnel. The flow divider has one 1" Female NPT inlet port and four 1/2" Female NPT outlet ports. There also is an additional port used for the gauge to mount into on the side. It has four 3/8" mounting holes used to mount the flow divider to the inside of the power unit. The hydraulic fluid lines are connected to the flow divider and then run to the necessary hydraulic application in the wash.

Specifications

- Inlet Port Size: 1" Female NPT
- Outlet Port Size: 1/2" Female NPT (4 Outlet Ports)
- Mounting Hole Diameter: 3/8"
- Material: Blue Painted Steel
- Dimensions: 10-1/2" X 3-1/2" X 4-3/4"
