

Tommy Central Vacuum Stainless Canister

Part Number: E-VAC-222-CV

Description: Tommy Central Vacuum System Canister

Price: \$2,500.0

Detailed Description

This vacuum canister is used in the vacuum area of the wash site. These canisters are used in the Tommy Central Vacuum system and have one canister in each vacuum stall. The canister is mounted onto the vacuum stanchion and the piping is mounted to the top of the canister that leads to the vacuum motor. Each canister is made of stainless steel material to withstand the outdoor elements and includes one 3" dump valve at the top and two stainless steel standoff brackets to mount the canister to the stanchion. The canisters are 13" in diameter and 40-1/2" tall. The dump door on the bottom of the canister is 10-1/2" in diameter and the two connection holes for the vacuum arch to connect to are 2-1/2" in diameter. This canister is where the dirt bags are stored to hold the dirt and debris that is vacuumed out of the guest vehicle. It has a three-latch stainless steel canister door and foam 3/8" thick door gasket.

Specifications

- Canister Diameter: 13"
- Canister Height: 40-1/2"
- Dump Valve Connection Size: 3"
- Vacuum Arch Connection Size: 2-1/2"
- Dump Door Diameter: 10-1/2"
- Standoff Bracket Length: 12"
- Standoff Bracket Mounting Holes: 2X 3/8" Holes, 4X 1/4" Holes
- Canister Material: Stainless Steel
- Gasket Material: Foam
