

Vacuum Motor Brush Kit

Part Number: P-VAC-234

Description:

Price: \$

Detailed Description

This brush kit is used in the Dual Vacuum Motors in the Vacuum area of the wash site and includes two motor brushes. These brushes help function the vacuum motors and come in 220v options. There are two motor brushes that are used in each vacuum motor. The motor brush carbon length when new is about 1" long. Once the carbon length has diminished to a length of about 3/16" they are ready to be replaced. When replacing motor brushes, be sure to replace the entire brush, not just the lead part. Install instructions are included.

Specifications
