

20A Circuit Breaker 1 Pole

Part Number: CCS-60113

Description:

Price: \$110.48

Detailed Description

This circuit breaker is used in many different electrical applications in the wash. It is a miniature circuit breaker with low voltage and enhanced protection. This circuit breaker has a current rating of 20 Amps and 1 protected pole. It has multiple protection features including preventing short circuits, earth leakage, and overload. It also helps prevent and protect both people and equipment from electrical threats. This circuit breaker has AC and DC network types and a C curve code. This circuit breaker is what is needed to allow business and process optimization through improved life-cycle asset management and optimized energy consumption.

Specifications

- Number of Protected Poles: 1
- Rated Current: 20 A
- Operational Voltage: 240 VAC
- Frequency: 50-60 Hz
- Operating Temp. Range: -22F-158F

Instillation
