

# 17 Tooth Dual Belt Machined Plastic Sprocket 3-1/2" Diameter

**Part Number:** P-C2262

**Description:**

**Price:** \$205.0

## Detailed Description

This sprocket is an essential component of the Dual Belt Conveyor System in the wash tunnel. Featuring a 3-1/2" inside square bore diameter and 17 teeth, it helps drive the belt's movement. The drive shaft fits in the center, while the belt rotates around the sprocket's exterior. Made from dense plastic, the one-piece design ensures durability. Each side of the conveyor uses 10 sprockets, totaling 20 sprockets in the wash tunnel for reliable performance.

## Specifications

- # of Teeth: 17
- Bore Size: 3-1/2"
- Color: White
- Material: Dense Plastic
- Dimensions: 12-1/4" X 2-1/4"
