

# CryptoPay 5-Wire No-Button Credit Card Swiper (MDB-NG)

**Part Number:** P-VAC-278

**Description:** Designed for the CryptoPay system. Durable for car wash environments, this compact swiper (4-1/4" L) facilitates secure point-of-sale transactions at vacuum stations and other vending units

**Price:** \$389.99

## Detailed Description

The CryptoPay 5-Wire No-Button Credit Card Swiper (MDB-NG) is an integral component of the CryptoPay payment system, specifically designed to process credit card transactions efficiently and securely at various point-of-sale locations. This swiper is commonly deployed in car wash environments, serving as a convenient payment method at vacuum stations for detail kits and other vending units. This model is distinguished by its "no button" design, simplifying the user experience, and utilizes a reliable 5-wire connection for seamless integration into your CryptoPay network. The swiper's compact dimensions, with a 3-3/4" swiping surface and overall swiper dimensions of 4-1/4" L x 1-7/8" W x 1-3/4" H, allow for flexible installation even in confined spaces.

The P-VAC-278 is built to be durable for the demanding car wash environment, ensuring longevity and consistent performance. It validates customer credit cards directly at the point of sale, contributing to a smooth transaction process. Its connection cable extends 13 inches, providing adequate reach for most installations. This swiper plays a key role in enabling secure wireless connections between itself and the central CryptoPay Coordinator ([P-VAC-212](#)), streamlining payment collection without the need for extensive wired infrastructure.

## Specifications

- Product Type: Credit Card Swiper
- Model/System Compatibility: CryptoPay System, MDB-NG
- Button Configuration: No Button
- Connection Type: 5-Wire Connection
- Swiping Surface Length: 3-3/4 inches
- Connection Cable Length: 13 inches
- Swiper Dimensions (L x W x H): 4-1/4" x 1-7/8" x 1-3/4"
- Application: Point of Sale (POS) system for credit card transactions at vacuum stations, vending units, etc., within car wash environments.
