

Z-Wrap/Rocker Brush/Tire Shine Arm Shock with 3/8" Bushing

Part Number: P-M2002-A

Description:

Price: \$41.99

Detailed Description

This shock is designed for use with Z-Wraps, Rocker Brushes, and Tire Shine units in the wash tunnel. It helps control the motion of the brush arms during the wash cycle, ensuring smooth and consistent operation. The shock is mounted between the rear shock mount and shock mount attachment on the Rocker Brush, between the wrap arm and ladder rack on the Z-Wrap Brush, and between the rear frame and main frame on the Tire Shine unit.

It comes with two 3/8" rubber bushings for added durability. If you notice fluid dripping from the shock or if it does not push in and out smoothly with some resistance, it's time to replace it to maintain optimal performance.

Specifications

- Bushing Diameter: 3/8"
- Bushing Material: UHMW Plastic
- Shock Extended Length: 27-1/2"
- Shock Compressed Length: 15-3/8"
- Shock Width: 2"
- Shock Color: Black
