

Z-Wrap Brush Arm Shock with 1/2" Bushing

Part Number: P-M2122-A

Description:

Price: \$41.99

Detailed Description

This shock is designed for the Z-Wrap Brush arms in the wash tunnel. It controls the movement of the brush arms during the wash cycle by regulating the motion between the motor cage and wrap arm. Featuring two 1/2" rubber bushings for added durability, this shock ensures smooth and controlled operation. If you see fluid leaking from the shock or if it does not push in and out smoothly with some resistance, it's time for a replacement to keep your system running efficiently.

Specifications

- Bushing Diameter: 1/2"
- Bushing Material: UHMW Plastic
- Shock Extended Length: 27-1/2"
- Shock Compressed Length: 15-3/8"
- Shock Width: 2"
- Shock Color: Black
