

Hydraulic Reverse Hugger™ Side Washers (Set) - Exit Facing, 75" Height

Part Number: E-SW-101-NC-A

Description: Featuring a pendulum swing for adaptive cleaning and alternate brush rotation, these units provide close, safe, and efficient cleaning for vehicle sides and rear surfaces. Designed for 5" small core brushes with 75" height (cloth and combo unit sold separately)

Price: \$11,810.0

Detailed Description

The Hydraulic Reverse Hugger™ Side Washers (Set) represents an **advanced friction cleaning solution designed to elevate wash quality in automatic car wash tunnels**. These exit-facing side washers incorporate the highest quality foam and soft cloth brush material (Please Note: cloth is sold separately) paired with a robust and simple operating mechanism.

A key innovation of the Reverse Hugger™ system is its pendulum swing motion. This intelligent design allows the brush's action to dynamically adjust to the unique contours and shape of customer vehicles, ensuring a consistently close, safe, and **highly efficient wash performance across the sides and rear surfaces**. The alternate rotation of the brushes further enhances cleaning effectiveness, ensuring more dirt is captured and tough-to-reach rear surfaces receive thorough attention.

This model features a hydraulic drive for reliable and powerful operation. Installation is notably fast and straightforward, requiring only 4 vertical bolts to U-bolt the unit to the top of any compatible Mitter or Tommy combo module (note: the combo unit for mounting is not included). The system comes as a set, including two arms, brush drives, and necessary fittings. It is specifically designed to utilize 5" small core brushes with increased cloth density and offers an impressive 75" brush height for comprehensive coverage. Electric version: [E-SW-101-NC-EL-A](#).

Combo Unit and Brushes Sold Separately.

Specifications

- Product Type: Hydraulic Reverse Hugger™ Side Washers (Set)
- Drive Type: Hydraulic Drive
- Mounting: U-bolts to top of Mitter or Tommy combo module (Combo unit NOT included)

Installation: Fast, 4 Vertical Bolts
