

10 Port POD Manifolds and Ball Valve

Part Number: P-HFI-203

Description:

Price: \$5,040.1

Detailed Description

The 10-Port POD Manifolds with Ball Valve are designed for efficient fluid distribution in complex systems. These manifolds provide precise control and are built for durability and reliable performance in demanding environments. The manifold mounts onto the POD panel and connects to the injectors and versadial devices. The included ball valve connects to the 39" long detergent feed hose.
