

0006 1/8" Male Stainless MEG Spray Nozzle

Part Number: P-F2060

Description:

Price: \$8.0

Detailed Description

This spray nozzle is used to spray water and/or detergent onto vehicles as they pass through the wash tunnel. These spray nozzles deliver precise accuracy and powerful impact. This specific spray nozzle has a 1/8" Male NPT connection and sprays a zero degree straight spray pattern. The nozzle is made of stainless steel to prevent rust and corrosion from happening in the wash tunnel. It has a reliable cleaning power for hard surfaces and a high-impact solid stream that cleans faster while delivering a uniform spray distribution.

Specifications

- Temperature Rating: 500F
- Port Size: 1/8" Male NPT
- Spray Angle: 0 Degrees
- Max Pressure: 3,000 PSI
- Orifice Size: #6
- Material : Stainless Steel
- Dimensions: 1" X 1/2"
