

Mechanical Seal Kit for Ebara EVMU Pump

Part Number: P-WAT-2662

Description: Mechanical Seal Kit specifically designed as a replacement for the shaft and internal seals in compatible Ebara pumps

Price: \$265.69

Detailed Description

The P-WAT-2662 contains a complete set of seals necessary for performing maintenance or repair on the Ebara pump's rotating assembly and casing.

Kit Contents

This comprehensive kit ensures all critical sealing points are addressed during pump overhaul:

- **Shaft Seal:** The primary replacement mechanical seal, which prevents fluid leakage along the rotating pump shaft.
- **Replacement Seals:** Includes four other necessary rubber replacement seals (O-rings and/or gaskets, varied in size) for static sealing points within the pump housing and manifold connections.

Application

This kit is essential for restoring the efficiency and leak-proof operation of the pump, which is crucial in water transfer and booster systems common in car wash operations.

- **Compatibility:** This seal kit is specifically designated for use with the Ebara EVMU18 vertical multistage centrifugal pump model.

Specifications

- Product Type: Mechanical Seal and Gasket Kit
- Brand: Ebara
- Alternate Part Numbers: 352665035K, MECHSEALKIT, S1125008-160C
- Application: Sealing component replacement for the Ebara EVMU18 pump.
- Kit Contents: Replacement Shaft Seal and 4 varied rubber replacement seals (gaskets/O-rings).
