

Metal Light Pole Hand Hole Cover Hardware Kit

Part Number: P-LED-4023

Description: Includes all necessary hardware to securely cover the pole's access point, including the cover, a gasket, a locking bar, and a screw

Price: \$28.8

Detailed Description

The Metal Light Pole Hand Hole Cover and Hardware Kit is a comprehensive solution for replacing or installing the access cover on a metal light pole. The hand hole provides essential access to the electrical wiring inside the pole for installation and maintenance. This kit ensures that this critical access point is sealed and protected from the elements.

Made from durable, silver-colored metal, the hand hole cover is built to withstand harsh outdoor conditions. The kit is designed to provide a secure and weather-tight seal, which is crucial for protecting internal wiring from moisture, dirt, and tampering. By including all the necessary hardware—the cover, a hand hole gasket, a locking bar, and a screw—this kit simplifies the replacement process, ensuring a perfect fit and a reliable seal.

This product is an essential maintenance item for preserving the integrity and safety of light poles in any outdoor setting.
