

10A Purclean Circuit Breaker

Part Number: P-WAT-2728

Description: ST201M-K10 10A Circuit Breaker

Price: \$112.76

Detailed Description

This circuit breaker is used in the Purclean system in the backroom of the wash tunnel. The circuit breaker has a current rating of 10 A and is a 1 pole breaker. This is the K Curve characteristic breaker and part of the ST200 M Series of circuit breakers. These circuit breakers are ideal for multiple applications and markets and the robust thermoplastic housing material makes great protection against external influences.

Specifications

- Current Rating: 10 A
- Characteristic: K Curve
- Rated Voltage: 277 VAC
- Operating Temp. Range: -13F-131F
- Material: Thermoplastic Housing
- Dimensions: 2-3/4" X 11/16" X 3-3/8"
