

32" Tire Shine Brush Arm Front (Entrance End) With Mounting Brackets

Part Number: P-TB-224-DB

Description:

Price: \$1,305.0

Detailed Description

This arm is used in the Tire Shine Applicator at the end of the wash tunnel. This arm is specific to the front driver side of the applicator and is meant for dual belt sites. The arm is 32" long and connects to the arm mount plate on one end and the motor on the other end. This arm is made of stainless steel to prevent rust and corrosion from happening while in the wash tunnel. The shafts on the ends of the arm are 1-1/4" in diameter and measure 7" long in total from end to end.
