

PVI 400,000 BTU Water Heater System Kit

Part Number: E-SE-2122-K

Description: 40L130A-GCML Conquest 130 Water Heater Kit

Price: \$32,100.0

Detailed Description

This water heater system kit is used in the backroom of the wash tunnel. The kit includes the water heater unit and acid neutralizer unit. The hot water in the wash tunnel allows for an overall better wash quality, wash chemistry, and increased efficiency in the bug removal application. The water heater in this system has a tank capacity of 130 gallons and a water connection size of 2". The gas vent connection on this water heater is 3/4" and the vent connection is 4". It has an input rating of 400,000 BTU. They are 33-3/4" in diameter and stand 80-3/4" tall. They use natural gas for heating the water and have a max temperature rating of 140F. These water heaters have a 97% thermal efficiency and stainless steel surface burner. Touchscreen operating controls and exceptionally quiet operation are just a few of the many features these water heaters have to offer. Included with the water heater kit is a free startup and temperature and pressure relief valve installed from factory.

Specifications

- Input: 400,000 BTU
- Thermal Efficiency: 97%
- Water Tank Capacity: 130 Gallons
- Water Connection Size: 2"
- Gas Connection Size: 3/4"
- Vent Connection Size: 4"
- Water Temperature Rating: 40F-140F
- Fuel Type: Natural Gas
- Burner Material: Stainless Steel
- Dimensions: 33-3/4" X 80-3/4"
