

# Tommy's Express Pi Entrance TV Display Controller

Part Number: TX-EM-PC-A

Description:

Price: \$297.51

## Detailed Description

This Pi controller is used for the tv at the entrance of the wash tunnel in the Entrance Module. The Pi controller converts signals from the Systems Integration Center (SIC) into images displayed on the entrance tv. The controller is specifically programmed to display images on the entrance tv only using a Raspberry Pi 4 system. For sites that currently have a Pi system, use this for replacing the Pi controller. For sites that are switching to the Pi system, use the retrofit unit ([CCS-TX-PI-EM-RETRO-A](#)).
