

Tommy's Express Versadial Maintenance POD

Part Number: TX-E-POD-MAINT-A

Description: Tommy's Express Stainless Maintenance POD with Versadial Control System - Provides More Precise Ratio for the Glass/Window Cleaner and Better Features for Maintenance Applications

Price: \$27,300.0

Detailed Description

This Tommy's Express Maintenance POD comes equipped with the new Versadial Control System for better control of the detergents. The Versadial system is key to improving reliability and consistency with the chemical control used in the wash tunnel. There are 10 ports included on this Maintenance POD, 7 of them are used for various applications while 3 are left empty as spare ports. By having a maintenance area directly inside the wash bay, this can increase efficiency and response time in the instance a problem occurs. This Maintenance POD saves the employees from running all over the wash site looking for different supplies and equipment. There are many features included in the Maintenance POD including the home for the Glass/Window cleaner, Tommy wall cleaning gun, multiple push button stations, bench vise, sink and faucet, tool cabinet, etc. The front of this Maintenance POD has a Tommy's Express decal on it facing towards the wash tunnel.
