

Swingaway Flange for Point of Sale Gate Arm

Part Number: POS-WC-2054

Description: FLSA-MBS Swingaway Flange

Price: \$372.32

Detailed Description

This flange is used in the Gate Arm system at the Point of Sale area of the wash site. This flange is a swingaway flange for the gate arm. It is meant to connect the gate arm to the base and has the ability to allow the gate arm to swing away from the base without damaging the base or the gate arm itself. This is done to limit any damage done to the vehicle or the wash site gate arm equipment when a vehicle makes contact with the gate arm. These swingaway flanges are not meant to be used with booms over 12' in length.
