

Ozone Leak Detection Kit

Part Number: P-SE-2190

Description:

Price: \$87.2

Detailed Description

This ozone detection kit is used in the Tommy Water Treatment Center. This kit uses Potassium Iodide crystals and water to detect if there is an ozone leak in any fittings or anywhere in the system. Included in the kit is the bag of Potassium Iodide crystals, mixing jar, and instructions on how to use the detection kit properly. When using this kit properly along with a damp paper towel, it will be evident if an ozone leak is present or not by seeing if the paper towel turns a dark color.
