

# Double-Stack High Pressure Pump Station with Tank - 20 GPM

Part Number: E-SE-2007-A

Description:

Price: \$28,600.0

## Detailed Description

Tommy Car Wash Systems's double stack pump station offers car wash owners a cost and space efficient way to power equipment in medium to large car washes.

By incorporating two pumps within a single water holding tank, the amount of space taken up within your car wash facility is dramatically reduced. Both pumps in this double pump station are 20 GPM H-25 pumps, powered by 15 horsepower electric motors.

## Specifications
