

Meraki MR44 Wireless Cloud Managed Access Point

Part Number: CCS-MR44

Description: MG44 Wi-Fi 6 Multigigabit Ethernet Access Point

Price: \$1,340.0

Detailed Description

Cellular access point used in the Systems Integration Cabinet (SIC) in the Flight Deck area of the wash site. This access point has Wi-Fi 6 performance and efficiency with a dedicated security radio. This is a cloud managed 2x2:2 + 4x4:4 802.11ax access point that raises the bar for wireless performance and efficiency. This access point offers high throughput, enterprise-grade security, and simple management. It includes 4 radios: concurrent 2.4 GHz and 5 GHz radios, real time WIDS/WIPS with automated RF optimization radio, and Bluetooth scanning and beaconing radio. With cloud management, high performance hardware, multiple radios, and advanced software features, this access point makes an outstanding platform for the most demanding of uses. The Power over Ethernet injector and DC adapter are both sold separately.

Specifications

- Dual-Radio Aggregate Frame Rate: 3 Gbps
- Number of Radios: 4
- Power: 42.5-57 V or 12 VDC Input
- Power Consumption: 30 W
- Operating Temp. Range: 32F-104F
- Dimensions: 12" X 5" X 1-3/4"
