

# Tommy Stainless Vacuum Stanchion with U-Bolts 10' Tall

Part Number: E-VAC-223-V

Description:

Price: \$1,450.0

## Detailed Description

The Tommy Vacuum Stanchion with U-Bolts unit is used in the vacuum stalls at the wash site. The stanchion is the center piece and anchor for the entire Dual Drop Vacuum System. Each stanchion is 10' tall, 5-1/2" in diameter, and made of stainless steel material. The base plate is 15-1/2" square in diameter with 1/2" thickness and has four mounting holes that are 7/8" in diameter. The vacuum arch mounting plates on the stanchion have six 1/2" mounting holes for the U-bolts to mount into that hold the vacuum arches onto the stanchion. The U-bolts have a 3" inside diameter to wrap around the vacuum arches and come with the 1/2" stainless nuts, flat washers, lock washers, and red U-bolt caps.

## Specifications
