

Tommy 1.1 Blower Replacement Nozzle

Part Number: P-RE-B2036

Description:

Price: \$135.0

Detailed Description

These nozzles are used on the Tommy 1.1 blower housings that are installed on the Tommy 1.1 blowers in the blower room. These nozzles come in the color black and have the option to be flanged or flangeless. The nozzles are made of UHMW plastic and are easily installed with included fastener sets. The nozzles are fixed in place and do not move once mounted onto the blower housing. They help pinpoint the direction of the air that flows from the blower to the surface of the guest's vehicle. Both flanged and flangeless nozzles have the same sized smaller end that is directed at the vehicle as it passes by. That small end measures 7-3/4" in width and 6-3/4" in length. The large end that either has or does not have a flange on it differs in size. The flanged version has the dimensions of 15-1/4" wide and 10" long while the flangeless version has the dimensions of 13" wide and 7-3/4" long on the bigger end of the nozzle that gets mounted onto the blower housing. The flanged nozzle measures 12-1/4" tall while the flangeless nozzle measures 12" tall. Ten 1/4" fastener sets come included.

Specifications

- Colors: Black
- Styles: Flanged or Flangeless
- Smaller Nozzle End Dimensions: 7-3/4" X 6-3/4"
- Larger Nozzle End Dimensions:
 - Flanged: 15-1/4" X 10"
 - Flangeless: 13" X 7-3/4"
- Height:
 - Flanged: 12-1/4"
 - Flangeless: 12"
- Mounting Hole Diameter: 1/4"
- Material: UHMW Plastic
