

# Brass 3/4" Female JIC X Hose Barb Fitting

**Part Number:** P-WAT-2899

**Description:**

**Price:** \$27.99

## Detailed Description

This hose barb fitting is used in the Fire Hose Repair Kit in the wash tunnel. It has a 3/4" Female JIC 37 degree connection on one end and a 3/4" hose barb connection on the other end. The hose barb can be used in hydraulic applications in addition to the fire hose. This is a straight fitting with push-on hose attachment capabilities, allowing users to work quickly and easily on site. There is no clamp required for this hose barb fitting and can be used in high temperature, dry air, hot water, and high pressure applications. It is made of brass material to resist corrosion and rust in the wash tunnel.
