

# Mat Washer 1 Gallon Chemical Jug

**Part Number:** P-RHM-118

**Description:** Specifically used for holding and dispensing chemicals for car wash mat washers and features a 1-1/2" mouth opening, a screw-on cap, and a built-in handle

**Price:** \$19.0

## Detailed Description

The P-RHM-118 Mat Washer Jug is a durable and practical container designed for the specific needs of car wash chemical management. Its robust construction from heavy-duty polyethylene material ensures that it can withstand the demanding conditions of a car wash environment, including exposure to various cleaning agents and frequent use.

With a 1-gallon capacity, this jug is perfectly sized to hold chemicals for mat washers located in the vacuum area of a wash site. The clear material allows operators to easily monitor the fluid level and identify the contents at a glance.

The jug is designed for ease of use and safety. It features a 1-1/2" mouth opening, which is large enough for controlled pouring and to prevent spills when refilling. The included screw-on cap provides a secure, leak-proof seal for safe storage and transport. A sturdy built-in handle makes carrying and maneuvering the jug simple, even when full.

The P-RHM-118 jug's combination of durable material, clear visibility, and user-friendly design makes it an essential tool for maintaining the mat washer system.

## Specifications
