

Tommy 2.0 Blower Replacement Nozzle

Part Number: P-BL-N

Description:

Price: \$136.37

Detailed Description

These nozzles are used on the Tommy 2.0 blower housings that are installed on the Tommy 2.0 blowers in the blower room. These nozzles come in the color black, are flanged, and have the option for a 12", 7-1/4", or 4-7/8" long nozzle. The nozzles are made of UHMW plastic and are easily installed with included fastener sets. The nozzles are fixed in place and do not move once mounted onto the blower housing. They help pinpoint the direction of the air that flows from the blower to the surface of the guest's vehicle. All nozzles have the same sized larger connector end that is mounted onto the housing, measuring 12-1/2" in width and 12" in length. Eight 3/8" fastener sets come included.
