

# Programmed 20HP Altivar 320 Variable Frequency Drive 200-240 VAC

Part Number: CCS-ATV320D15M3C-A

Description: ATV320D15M3C Variable Frequency Drive Programmed

Price: \$3,142.23

## Detailed Description

This programmed variable frequency drive is used in the Main Control Centers in the backroom of the wash. It helps control the motors, pumps, and blowers used in the wash. This specific frequency drive has a supply voltage range of 200-240 VAC and an output power of 20 HP. It offers many features including application specific functions, advanced connectivity, and open loop motor control. These drives are compatible with 3 Phase synchronous and asynchronous motors. The variable frequency drive is meant to be panel mounted. This variable speed drive is programmed and ready for install out of the box. **If you don't see a specific variable frequency drive unit or need additional information, please contact our Client Services Team at (616) 795-4893 or Clientservices@tommycarwash.com.**

## Specifications

- Current Rating: 66 A
- Output Frequency: 0.1-599 Hz
- Horsepower: 20 HP
- Motor Power Rating: 15 kW
- Supply Voltage Range: 200-240 VAC
- # of Phases: 3-Phase
- Supply Frequency: 50/60 Hz
- Operating Temp. Range: 14F-122F
- Dimensions: 7-3/4" X 7-1/8" X 13"
