

1/2" Stainless Steel Hydraulic Tubing 32-1/2" Long with Two 45-Degree Bends

Part Number: P-RT-0066

Description:

Price: \$18.3

Detailed Description

This 1/2" tubing is used in the Reverse Hugger in the wash tunnel and is only used on Hydraulic Reverse Hugger units. The tubing is mounted on top of the brush arm and connects to the hydraulic lines that feed power to the motors. The tubing is 32-1/2" long with an outside diameter of 1/2" and has a 45-degree bend on each end. This tubing is made of stainless steel to prevent rust and corrosion in the harsh wash tunnel environment.

Specifications
