Part Number: P-AIR-2351-K

Description: Need help deciding what series your air compressor is? Contact our Client Services team at (616) 795-4893 or Clientservices@tommycarwash.com or [click here for our air compressor model and serial number guide](#).

Price: \$892.87

Detailed Description

Maintenance kit used on Atlas Copco Series 2 air compressor units in the backroom of the wash tunnel. Included in the maintenance kit are two air filters, two oil filters, one oil separator, one belt, and two oil analysis kits. **It is important to note that oil is not included in this maintenance kit.** At 2,000 hours, an oil analysis and oil change should be performed, and air filter and oil filter should be replaced. At 4,000 hours, a complete service of performing an oil analysis and oil change and replacing the air filter, oil filter, oil separator, and belt should be done. [Please use this link to help determine what series air compressor unit you have to ensure what maintenance kit to purchase.](#) Contact our Client Services Team at (616) 795-4893 or Clientservices@tommycarwash.com with any questions or if any individual components in this kit need to be purchased separately.
